

How to Make Origami Paper

1. Gather your paper. Use whatever you can find, it can be a blank or lined paper.
2. Fold your paper. Take the top right corner of your paper and fold it down until it touches the left edge of your paper. The top edge of your paper should now be “meeting” the left side of your paper. It will look like a triangle “sail” sitting on top of a rectangle.

3. Remove the rectangle sitting below your triangle. You can do this with scissors, or you can fold the rectangle part of the paper over the front and back of the triangle several times, creating a crease. Then carefully rip the paper along the crease.
4. You now have a square piece of paper ready for origami!
